

# WHAT DID 100 SURVEYED GRADUATES SAY ABOUT THE GREAT EXPECTATIONS PROCESS?

The following is a look at portions of the feedback collected from recent graduates of the *Great Expectations* core program. Respondents were a part of test classes in 2007 used to assess the effectiveness of the program design. Each person received a full scholarship or paid a small materials fee. 100 surveys were selected randomly from a pool of 159 respondents. Students were provided with an explanation of each item before recording each rating, and a slight *halo effect* should be assumed given the timing of the surveys (the end of Session #24). Graduates were asked to rate each of the following items using a 10-point scale (10 = Truly Outstanding; 1 =Extremely Poor).

NO. OF RESPONSES = The total number of responses collected for a particular item  
 TOTAL POINTS = The total point value of all responses collected for a particular item  
 HIGH = The highest single score for each item  
 LOW = The lowest single score for each item  
 AVG = The average of all responses for each item
